

Make up assignments

Making up points in physical education can only be done for students who have missed class for an excused absence through the school. To make up points in my class students will notify me that they have an excused absence and will do the following: 30 minutes of physical activity that is done outside the classroom setting (or within based on off periods) with a signature from a parent, guardian, or supervisor of the activity along with a paragraph stating what was done for the make up and why it is important for physical activity or health.
